DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group III, claim 67 in the reply filed on November 3, 2004 is acknowledged.

The requirement is still deemed proper and is therefore made FINAL.

Claims 48 – 64 are withdrawn from consideration, as being drawn to non-elected subject matter. Claim 67 has been considered on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 67 is rejected under 35 U.S.C. 102(b) as being anticipated by Delwiche et al. (US 4743445).

Applicant claims a method for treating a subject having above normal platelet counts, the method comprising administering to the subject in need, an MPL pathway inhibitory agent in an amount effective to reduce platelet count.

Delwiche teaches a method for treating essential thrombocythemia (a subject with above normal platelet counts), the method comprising administering to the subject an amount of alpha-type interferon effective to reduce the platelet count (abstract).

Art Unit: 1651

Since applicant defines an MPL pathway inhibitor as an agent that interferes with MPL receptors, or TPO (specification, page 20), and alpha type interferon directly suppresses TPO induced megakaryocyte growth (see attached, Wang et al., abstract, as evidence thereof), the alpha type interferon qualifies as an MPL pathway inhibitory agent.

Therefore, the reference anticipates the claimed subject matter.
